EXECUTIVE SUMMARY

BACKGROUND

most government, parastatals and private companies have now found the need of migrating their services into cloud and internet based platforms in order to reach a broad base of customers and as well as to enable their clients to access their services from anywhere in the world (GIRO,2020).As much as the African population constitute much of the youth than the elderly, the youth uses much more of cloud based and internet based platforms.

Texcorp Solutions PTY LTD is an Information, Communication and Technology (ICT) service provider based company established to provide such reasonable and affordable services to the marginalised communities, unemployed and rural settlement communities, because as much as various institutions migrate their services into cloud and internet based platforms, they also not to be left behind.

TEXCORP
SOLUTIONS PTY LTD

OBJECTIVES

- To provide an ad-hoc software development service based on client and the market requirements.
- To enhance service delivery in the field of transportation, finance & Banking, communication, mining, agriculture and engineering through the use of ICT based technological methods.
- To expand access to ICT infrastructure by different communities throughout the region of Africa.
- To establish a knowledge exchange in ICT by partnering with both rural communities, ICT based companies located in developing and developed regions

MISSION

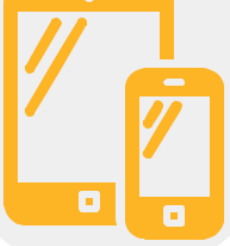

To provide an easy access to ICT based services to various businesses and communities living in Africa based on the following principles:

- Anticipating client needs.
- Building good company reputation.
- Quality (Getting the job done right the first time, offering 100% guarantee).
- Identify businesses where our solutions can be effectively implemented.
- Adapt or manufacturing software solutions according to the needs of the industry or client.

WEBSITE DEVELOPMENT

Web application development is one of the most sought field by the business world since it is applicable right from streamlining business process to communication building.

There is huge demand for web applications like CRM (customer relationship management) which allows the business people to enhance their sales and build long term customer relationship. Apart from enterprise solutions, there are web applications for commercial purpose, games, as well as for education via online.

We develop web applications that are secure and safe over the internet. Our cloud computing services allows the people to access the application from anywhere at anytime. We adhere to strict coding styles and user interface that are simple and user-friendly. We deliver rich internet applications (RIA) by adapting to quality development methodology.

E-LEARNING

E-Learning exploits interactive technologies and communication systems to improve the learning experience. It has the potential to transform the way we teach and learn across the board. It can raise standards, and widen participation in lifelong learning. It cannot replace teachers and lecturers, but alongside existing methods it can enhance the quality and reach of their teaching, and reduce the time spent on administration. It can enable every learner to achieve his or her potential, and help to build an educational workforce empowered to change. It makes possible a truly ambitious education system for a future learning society.

TEXCORP
SOLUTIONS PTY LTD

Our service is nothing but the finest and our fast & friendly response, effective support methods and our powerful communication strategy is what rightly differentiates us from our competitors. Professionals who ensure a fast turnaround and accurate support provision manage our service desk. We have designed our support packages around your requirements and use World Class products to enhance our support experience to you. We offer 3 Business Support Packages for Service Level Agreements (SLA), each of which are specifically designed to give you the correct IT support solution for your business, be this onsite or remote. Our management software allows you to login to our portal to view an Executive Summary of your IT environment – 24/7. We provide monthly management reports for you to view at your leisure assuring you that your IT is in respectable hands. Texcorp Solutions maintains high levels of service throughout our company so you can be assured to receive a classy experience from us.

GRAPHIC DESIGN

Corporate Identity Design

This is the design of the corporate identity of a clients company or organisation. This includes the design of a logo, business card, printing of business cards, letterhead design. There are optional extras such as envelope design, company profile booklet design, CD/DVD cover design and mostly anything business related.

Logo Design We do professional logo designs and logo's that are print friendly. We do black and white logo designs and full colour logo designs.

Business Card Design and Print We design your business card according to the colour scheme of your company logo and identity. We can also print your business cards for you. (These can be hand delivered within limpopo or courier it)

Other Design Services

.Advertisement Design, Flyer Design, Brochure Design, Book Cover Design, CD Cover Design, Banner Design, Photo Manipulation, Photo enhancement, Photography, Graphic and Illustration Consultant. Web graphics design, all graphics design services available.

NETWORKING

We focus on everything networking including security such as Networking, Access Control, Alarm Systems, Gate and Garage Door Automation, Intercom, Electric Fencing, Switches & PCB's, Fire Alarm System, Lock & Door Closers, Remote and Receivers Security Hardware, CCTV Installation etc. We provide these services directly and indirectly to maximise security.

TEXCORP

WIFI INSTALLATION

Wireless communication has become increasingly popular in the computing industry as well as in our daily life. The technology, with the emergence of cross vendor industry standards has shaped a number of popular and cost-effective wireless solutions for business and educational purposes. We outsource existing companies to maximize connectivity.

IT HOSTED SERVICES

Cloud computing has been around for over a decade. Our cloud services include products such as Web hosting, Email Hosting, Hosted Exchange, Hosted SharePoint and various custom designed applications. Cloud solutions are predominantly software applications that are stored in a hosting centre, which caters for power and connectivity redundancy so your business can always operate
